INDEX OF AUTHORS VOLUME 14

A

ABSHER, M. *See* BROWN, RYAN, ABSHER and OLAZABAL 651
—, *See* RYAN, ABSHER, OLAZABAL, BROWN and RYAN 637
AIZU, S. Morphological differences between excitatory and inhibitory nerve terminals in cockroach coxal muscles 329
ANDREUCCETTI, P. and CAMPANELLA, C. Regional differences in the pattern of vitellogenesis in the painted frog 681
ARCH, S. *See* BEARD, MILLECCHIA, MASUOKA and ARCH 297

B

BEARD, M., MILLECCHIA, L., MASUOKA, C. and ARCH, S. Ultrastructure of secretion in the atrial gland of a mollusc, *Aplysia* 297
BECKER, J. *See* GOUDEAU and BECKER 273
BEIGEL-HEUWINKEL, U. Helical fibrils in the mesoglea of a hydropolyp 225
BERGIN, M. E. *See* JOHNSON, BERGIN and BORG 425
BERTONI-FREDDARI, C. *See* NAGY, LUSTYIK and BERTONI-FREDDARI 47
BINNINGTON, K. C. and LANE, N. J. Presence of T-bars, intramembrane particle arrays and exocytotic profiles in neuroendocrine terminals of an insect 463
BIRDWELL, D. R. *See* SCHLEEF and BIRDWELL 629
BIRKHEAD, M., LUKE, B. and MANN, S. Intracellular localization of lead in tissues of a mute swan 691
BORDEREAU, C. Ultrastructure and formation of the physogastric termite queen cuticle 371
BORG, T. K. *See* JOHNSON, BERGIN and BORG 425
BOWERS, D. E. *See* SAMPSON, BOWERS, CANNON and PISCOPO 735
BRADLEY, R. J., STUART, A. M. and SATIR, P. The ultrastructure of the larval Malpighian tubules of a saline-water mosquito 759
BRODIE, D. A. Bismuth chemistry and the glutaraldehyde insensitive staining reaction 39
—, Golgi complex beads in vertebrates and their relationship with clathrin coats 253
—, HUIE, P., LOCKE, M. and OTTENSMEYER, F. P. The correlation between bismuth and uranyl staining and phosphorus content of intracellular structures as determined by electron spectroscopic imaging 621
—, LOCKE, M. and OTTENSMEYER, F. P. High resolution microanalysis for phosphorus in Golgi complex beads of insect fat body tissue by electron spectroscopic imaging 1
—, The arrangement of the Golgi complex beads is not controlled by the cytoskeleton 263
BROOKER, B. E. *See* MACKENZIE, FORSYTH, BROOKER and TURVEY 231
BROWN, L. M., RYAN, U. S., ABSHER, M. and OLAZABAL, B. M. Mathematical analysis of endothelial sibling pair cell-cell interactions using time lapse cinematography data 651
—, *See* RYAN, ABSHER, OLAZABAL, BROWN and RYAN 637
BUCKWALTER, J. A. *See* TROUT, BUCKWALTER, MOORE and LANDAS 359
BURWEN, S. J. Recycling of mast cells following degranulation *in vitro:* an ultrastructural study 125
BÜSCHER, G. *See* FAWCETT, BÜSCHER and DOXSEY 183, 397

C

CAMPANELLA, C. *See* ANDREUCCETTI and CAMPANELLA 681
CANCALON, P. Degeneration and regeneration of olfactory cells induced by $ZnSO_4$ and other chemicals 717
CANNON, M. S. *See* SAMPSON, BOWERS, CANNON and PISCOPO 735
CHAPMAN, D. M. Localization of methylene blue paramolybdate in vitally stained nerves 475
CHERNOFF, E. A. G. and HILFER, S. R. Calcium dependence and contraction in somite formation 435
COBB, J. L. S. *See* STUBBS and COBB 573
CONRAD, J. *See* MÜLLER, CONRAD, PONDELJAK, STEFFEN and ZAHN 219

INDEX OF SUBJECTS VOLUME 14

A

Absorptive cells, avian intestinal, lysosomal proliferation in, 585
Acrosomal zonule, 283
Acrosome, in insect sperm, 113
—, reaction, and gamete contacts, in a crab, 97
Aggregation factors, sponge, EM characterization of, 219
Amphibian, painted frog, vitellogenesis in, 681
Annelid, polychaete, yolk formation in, 669
Anthozoan, democyte, development of, 85
Arachnid, spider, silk secretion in, 297
Atrial gland, of mollusc, secretion in, 297
Autophagic vacuoles, of mast cells, 125
Axoneme, of anthozoan cilia, 607
—, of insect sperm, 113

B

Basal apparatus, ciliary, control of anthozoan cilia by, 607
Bird, lysosomal proliferation in rachitic avian intestinal absorptive cells, 585
—, mute swan, intracellular localization of lead in tissues of, 691
Bismuth, and uranyl staining, of intracellular structures, as determined by electron spectroscopic imaging, 621
—, chemistry, and glutaraldehyde insensitive staining reaction, 39
α-bungarotoxin, differential accessibility to two insect neurones does not account for differences in sensitivity to, 489

C

Cadmium, distribution of, in hepatopancreas of woodlouse, 703
Calcium dependence, and contraction, in somite formation, 435
—, in spherites of mussel, X-ray microprobe study of, 61
—, localization, intracellular, in stimulated and non-stimulated extraorbital lacrimal glands of rats, 735
—, regulation, in myocardial cells, 25
Carcinoma cells, murine parietal, 425
Cell death, and secretion, in molting glands of an insect, 243
—, type selectivity, and host cell responses, to Theileria, 397
Central visual cells, R7/8, in blowfly eye, 341
Cilia, control of by the basal apparatus, 607
Ciliary feeding structure, a new, in an ophiuroid echinoderm, 573
Clathrin coats, Golgi complex beads and their relationship with, in vertebrates, 253
Cnidaria, desmocyte development in, 85
Coated vesicles, Golgi complex beads in vertebrates and their relationship with clathrin coats, 253
Coelenterate, anthozoan, control of cilia by the basal apparatus in, 607
—, —, desmocyte development, fine structural aspects of, 85
—, helical fibrils in the mesogea of a hydropolyp, 225
—, Hydra, ultrastructural analysis of nematocyte removal in, 415
Collagen, -coated microcarrier for endothelial and HeLa cells, 69
—, gels, culture of bovine mammary epithelial cells on, 231
Connective tissue, mesoglea of hydropolyp, helical microfibrils in, 225
Contractile system, axoneme of sperm, 113
Contraction, and calcium dependence, in somite formation, 435
Copper, distribution of, in hepatopancreas of woodlouse, 703
Cortical reaction, and fertilization membrane, 273
Crustacean, crab, early events in the ovary, and cytological aspects of the acrosome reaction and gamete contacts in, 97
—, horsehoe crab, the T-axial membrane system in striated muscles of, 531
—, lobster, SR of ultrafast muscle in: evidence of a tubular configuration, 163
Cuticle, molting glands of an insect, 243
—, of physogastric termite queen, ultrastructure and formation of, 371
Cytoskeleton, arrangement of Golgi complex beads is not controlled by, 263
—, desmocytes of anthozoan, 85
—, microfibril formation in chick notochordal cells, 171

D

Degranulation, of mast cells, *in vitro*, 125
Desmocyte, anthozoan, development of, 85
Dry mass content, and intracellular water, as measured by energy-dispersive X-ray microanalysis, 47

E

Echinoderm, ophiuroid, a new ciliary feeding structure in, 573
Electron spectroscopic imaging, microanalysis for phosphorus by, 1
— — —, the correlation between bismuth and uranyl staining and phosphorus content of intracellular structures as determined by, 621
Embedding media, introduction of Ladd-112 and Poly/bed-812 as dehydrants for epoxy resin embedment, 13
Embryo, chick, microfibril formation in notochordal cells of, 171
Embryogenesis, calcium dependence and contraction in somite formation, 435
—, murine parietal yolk sac carcinoma cells, 425
Endocrine system, nerve terminals in, 463
Endoplasmic reticulum, undulating arrays of, in spermatids, 289
Endothelial cell, migration, effect of fibrin on, *in vitro*, 629
—, cells, and HeLa cells, growth of on a new multipurpose microcarrier that is positive, negative or collagen coated, 69
— —, pulmonary, proliferation of: time lapse cinematography of growth to confluence and restitution of monolayer after wounding, 637
— —, sibling pair interactions, mathematical analysis of, 651
Endothelium, microvascular, use of microcarriers to isolate and culture. 597
Energy-dispersive X-ray microanalysis, 47
Epoxy resin, embedment, Ladd-112 and Poly/bed-812 as dehydrants for, 13
Erythrocytes, intracellular localization of lead in, 691
Excitatory nerve terminals, in muscles, 329
Exocytosis, in neuroendocrine terminals, 463
Eye, Harderian glands, 135, 149
—, of blowfly, morphological differentiation of the central visual cells R7/8 in various regions of, 341

F

Fat body, insect, 1
Fertilization, in a crab, acrosomal reaction and gamete contact, 97
—, — — —, cytological aspects of the cortical reaction and fertilization membrane elaboration, 273
Fibrillogenesis, in chick notochordal cells, 171
Fibrils, helical, in mesoglea of hydropolyp, 225
Fibrin, effect of, on endothelial cell migration *in vitro*, 629
Fish, anchovy, quantitative analysis of ultrastructure and vascularization of slow muscle fibres in, 319
Fixative, glutaraldehyde insensitive staining reaction, 39
—, lipid solubility of, 13
Fluorescence, peroxidase activity and fine structure, in Harderian glands of mice, 135
Freeze-fracture, of insect flight muscle, 501
—, of mitochondria and gap junctions in mammalian myocardium, 25
—, of ultrafast muscle, 163
—, presence of T-bars, intramembrane particle arrays and exocytotic profiles in neuroendocrine terminals of an insect, 463

G

Gap junctions, and mitochondria, association between in myocardial cells, 25
Gels, collagen, culture of bovine mammary epithelial cells on, 231
Glutaraldehyde, -insensitive staining reaction, and bismuth chemistry, 39
Golgi beads, arrangement of is not controlled by the cytoskeleton, 263
— —, in vertebrates, and their relationship with clathrin coats, 253
—, — of insect fat body, phosphorus in, 1
— complex beads, arrangement of is not controlled by the exoskeleton, 263
— —, —, high resolution microanalysis for phosphorus in, 1
— —, —, in vertebrates, and their relationship with clathrin coats, 253
— —, lead staining in, 541

H

Harderian glands, of mice, 135, 149
HeLa cells, and endothelial cells, growth of, on a carrier that is positive, negative or collagen coated, 69
Hepatopancreas, of woodlouse, distribution of zinc, cadmium, lead and copper in, 703
Historical study, of Leeuwenhoek's first microbial specimens, 207
HVEM, the three-dimensional structure of the Z disc in insect supercontracting muscles, 309
Hydra, ultrastructural analysis of nematocyte removal in, 415
Hydropolyp, helical fibrils in the mesoglea of, 225

I

Inhibitory nerve terminals, in muscles, 329
Insect, blowfly, central visual cells R7/8 in, 341
—, cockroach, coxal muscles, morphological differences between excitatory and inhibitory nerve terminals in, 329
—, fat body of, phosphorus in Golgi complex beads, 1
—, fly, functional morphology of midgut of, as compared to other hematophagous Nematocera, 751
—, neuroendocrine terminals in, 463
—, neurones, sensitivity to α-bungarotoxin, 489
—, Oncopeltus, secretion and cell death in molting glands of, 243
—, physogastric termite queen cuticle, ultrastructure and formation of, 371

—, saline-water mosquito, the ultrastructure of the larval Malphigian tubules in, 759
—, silkmoth, contacts of pore tubules and sensory dendrites in antennal chemosensilla of, 451
—, supply of oxygen to flight muscles of: a theory of tracheole physiology, 501
—, the giant sperm of a minute beetle, 113
Insects, the three-dimensional structure of the Z disc in supercontracting muscles in, 309
Intervertebral disc, human, changes in notochordal cells with age, 359
Intestinal absorptive cells, avian, lysosomal proliferation in, following 1,25-dihydroxycholecalciferol, 585
Intracellular water, and dry mass content, as measured in bulk specimens by energy-dispersive X-ray microanalysis, 47

J

Junctions, gap, in myocardium, 25

K

Kidney, intracellular localization of lead in, 691

L

Lacrimal glands, of rat, calcium localization in, 735
Ladd-112, and Poly/bed-812, as dehydrants for epoxy resin embedment, 13
Lead, distribution of, in hepatopancreas of woodlouse, 703
—, intracellular localization of, in tissues of the swan, 691
Leeuwenhoek, first microbial specimens, cytological examination of, 207
Lipid, fluorescence of, in Harderian glands of mice, 135
— solubility, of fixative, staining and embedding media, 13
Liver, intracellular localization of lead in, 691
Lysosomal proliferation, in rachitic avian intestinal absorptive cells following 1,25-dihydroxycholecalciferol, 585
Lysosomes, of mast cells, following degranulation, 125

M

Malpighian tubules, larval, of a saline-water mosquito, 759
Mammary epithelial cells, culture of, on collagen gels, 231
Mast cells, recycling of, following degranulation *in vitro*, 125
Mesoglea, of hydropolyp, helical microfibrils in, 225
Metaplasia, in Harderian glands of albino mice, induced by constant light exposure, 149
Methylene blue paramolybdate, localization of, in vitally stained nerves, 475
Microanalysis, EM histochemical and X-ray microprobe study of spherites in a mussel, 61
—, energy-dispersive, measurement of intracellular water and dry mass content by, 47
—, high resolution, for phosphorus in Golgi complex beads of insect fat body tissue by electron spectroscopic imaging, 1
Microbial specimens, of Leeuwenhoek, cytological examination of, 207
Microcarrier, multipurpose, growth of endothelial and HeLa cells on, 69
Microcarriers, use of, to isolate and culture pulmonary microvascular endothelium, 597
Microfibril formation, in chick notochordal cells, 171
Microfibrils, in notochordal cells, 359
Microvascular endothelium, pulmonary, use of microcarriers to isolate and culture, 597
Midgut, functional morphology of, in a sandfly, 751
Mitochondria, association between, and gap junctions in mammalian myocardial cells, 25
Mitochondrial derivative, in spermatozoa of a mollusc, 775
Mollusc, *Aplysia*, atrial gland secretion, 297
—, opisthobranch, spermatids of, 289
Molting glands, ultrastructural changes accompanying secretion and cell death in, in an insect *Oncopeltus*, 243
Morphometric analysis, of insect midgut, 751
Muscle, association between mitochondria and gap junctions in mammalian myocardial cells, 25
—, cardiac, association between mitochondria and gap junctions in, 25
—, flight, of insects, supply of oxygen to: a theory of tracheole physiology, 501
—, of the horseshoe crab, the T-axial membrane system in, 531
—, sarcoplasmic reticulum, of an ultrafast muscle, 163
—, slow fibres, of anchovy, quantitative analysis of ultrastructure and vascularization of, 319
Muscles, supercontracting, of insects, three-dimensional structure of Z disc in, 309
Mussel, spherites in, X-ray microprobe study of, 61
Myocardial cells, association between mitochondria and gap junctions in, 25
Myoneural junctions, excitatory and inhibitory, structure of, 329

N

Nematocyte, removal, in Hydra, ultrastructural analysis of, 415
Nervous system, degeneration and regeneration of olfactory cells induced by zinc sulphate and other chemicals, 717
— —, differential accessibility to two insect neurones does not account for differences in sensitivity of α-bungarotoxin 489
— —, excitatory and inhibitory nerve terminals in cockroach coxal muscles, morphological differences between, 329
— —, localization of methylene blue paramolybdate in vitally stained nerves, 475
— —, sensory, contacts of pore tubules and sensory dendrites in antennal chemosensilla of a silkmoth: demonstration of a possible pathway for olfactory molecules, 451

— —, —, differentiation of the central visual cells R7/8 in blowfly eye, 341
— —, T-bars, intramembrane particle arrays and exocytotic profiles in neuroendocrine terminals, 463
Notochord, microfibril formation in, 171
Notochordal cells, changes, with age: ultrastructure of human intervertebral disc, 359

O

Olfactory cells, degeneration and regeneration of, induced by zinc sulphate and other chemicals, 717
Oocyte, growth, in the sheepshead minnow: uptake of exogenous proteins by vitellogenic follicles, 555
Ovary, crab, acrosome reaction and gamete contacts in, 97
—, —, cortical reaction and fertilization membrane elaboration, 273

P

Parietal cells, yolk sac carcinoma, cultured, 425
Peroxidase activity, fluorescence and fine structure, of secretions of Harderian glands, 135
Phosphorus content, of intracellular structures, determined by electron spectroscopic imaging, 621
—, microanalysis for, by electron spectroscopic imaging, 1
Pigment, in Harderian glands of mice, 135
Poly/bed-812, and Ladd-112, as dehydrants for epoxy resin embedment, 13
Pore tubules, and sensory dendrites, in chemosensilla, 451
Porphyrins, in Harderian glands, 135, 149
Protozoan, *Theilera parva*, vector of East Coast fever, cell type selectivity and host cell responses to, 397
—,—, ultrastructure of sporogony in, 183
Pyriform glands, in a spider, conduction of silk in, 519

R

Respiratory system, a theory of tracheole physiology, 501
Reproductive system, giant sperm of a minute beetle, 113
— —, oocyte growth in a teleost, uptake of exogenous proteins by vitellogenic follicles, 555
— —, ovary, in a crab, acrosomal reaction, 97
— —, —, — — —, cortical reaction and fertilization membrane elaboration, 273
— —, regional differences in the pattern of vitellogenesis in the painted frog, 681
— —, scanning electron microscopy of post-ejaculatory spermiogenesis in a tick, 785
— —, studies on the fine structure of the mitochondrial derivative in spermatozoa of a gastropod, 775
— —, the acrosomal zonule, 283
— —, undulating arrays of endoplasmic reticulum in the spermatids of an opisthobranch mollusc, 289
— —, yolk formation in a polychaete annelid, 669

S

Salivary gland, tick, vector of East Coast fever, IV. Cell type selectivity and host cell response to *Theileria*, 397
— —, —, — — — — —. III. The ultrastructure of sporogony in *Theileria*, 183
Sarcoplasmic reticulum, of an ultrafast lobster muscle: first evidence of a tubular configuration, 163
Secretion, and cell death, in molting glands of an insect *Oncopeltus* 163
—, of silk, in a spider, fine structural aspect of, 519
—, ultrastructure of, in atrial gland of a mollusc *Aplysia*, 297
Sensory dendrites, in antennal chemosensilla, 451
Silk secretion, in a spider, II. Conduction in the pyriform glands, 519
Somite formation, calcium dependence and contraction in, 435
Sperm, giant, of a minute beetle, 113
Spermatids, of an opisthobranch mollusc, arrays of ER in, 289
Spermatozoa, of mollusc, fine structure of mitochondrial derivative in, 775
Spermiogenesis, post-ejaculatory, in a tick, SEM study of, 785
Spherites, calcium, X-ray microprobe study of, 61
Sponge aggregation factors, EM characterization of, 219
Sporogony, ultrastructure of, in *Theileria parva*, 183
Squamous metaplasia, in Harderian glands, 149
Staining, bismuth and uranyl, and phosphorus content, of intracellular structures, determined by electron spectroscopic imaging, 621
Staining, glutaraldehyde insensitive-, and bismuth chemistry, 39
—, lead, in the Golgi complex, 541

T

T-axial membrane system, in muscle of the horseshoe crab, 531
T-bars, in neuroendocrine terminals, 463
Termite, queen, formation of cuticle in, 371
Theileria parva, cell type selectivity and host cell response to, 397
— —, ultrastructure of sporogony in, 183
Tick, SEM of post-ejaculatory spermiogenesis in, 785
—, vector of East Coast fever, salivary gland of, 183, 397
Time lapse cinematography, of cultured endothelial cells, 637, 651
Tissue culture, effects of serum concentrtion on some growth characteristics of cultured murine parietal yolk sac carcinoma cells, 425
— —, mathenatical analysis of endothelial sibling pair cell-cell interactions using time lapse cinematography, 651
Tissue culture, of bovine mammary epithelial cells, 231
— —, of endothelial and HeLa cells, 69
— —, of mast cells, 125

— —, proliferation of pulmonary endothelial cells: time lapse cinematography of growth to confluence and restitution of monolayer after wounding, 637
— —, the effect of fibrin on endothelial cell migration *in vitro*, 629
— —, the resistance of epithelia to vascularization: proteinase and endothelial cell growth inhibitory activities in urinary bladder epithelium, 657
— —, use of microcarriers to isolate and culture pulmonary microvascular endothelium, 597
Tonofilaments, in anthozoan desmocyte development, 85
—, in Harderian glands of albino mice, 149
Tracheole, physiology, a theory of: supply of oxygen to the flight muscles of insects, 501
T-system, and SR, of ultrafast lobster muscle, 163
—, of muscle, in horseshoe crab, 531

U

Urinary bladder epithelium, proteinase and endothelial cell growth inhibitory activities in, 657

V

Vascularization, analysis of, in slow muscle fibres, 319
—, resistance of epithelia to: proteinase and endothelial cell growth inhibitory activities in urinary bladder epithelium, 657
Vitellogenesis, in an annelid, 669
—, in teleost oocytes, 555
—, in the painted frog, regional differences in the pattern of, 681

X

X-ray analysis, intracellular localization of lead in tissues of the mute swan, 691
— —, the distribution of zinc, cadmium, lead and copper within the hepatopancreas of a woodlouse, 703
— microanalysis, measurement of water and dry mass content by, 47
— microprobe, study of spherites in a mussel by, 61

Y

Yolk formation, in a polychaete annelid, 669
— —, in a teleost, 555
— —, in the painted frog, regional differences in the pattern of, 681
— sac, murine parietal, carcinoma cells, growth characteristics of, 425

Z

Z disc, of supercontracting muscles, structure of, 309
Zinc, distribution of, in hepatopancreas of woodlouse, 703
— sulphate, degeneration and regeneration of olfactory cells induced by, 717
Zonule, acrosomal, 283
